Platform Overview & Account Roles

AgriShare provides tailored user experiences depending on whether you are renting or leasing machinery.

Farmer / Renter Role

Designed for smallholder and commercial farmers seeking specialized machinery without capital expenditure.

- Search equipment across 8 agricultural categories
- Real-time booking calendar with clash prevention
- Transparent pricing: Daily rate + refundable security deposit
- Submit verified reviews upon completed rentals

Equipment Owner Role

Designed for progressive farmers, dealers, and cooperatives with idle agricultural machinery.

- List machinery with high-resolution photos and specifications
- Set customized daily rental rates and security deposits
- Review, approve, or decline booking inquiries
- Track rental earnings and utilization via owner dashboard

Pre-Configured Demo Accounts Matrix

Use these authenticated profiles for instant evaluation and testing on local instances.

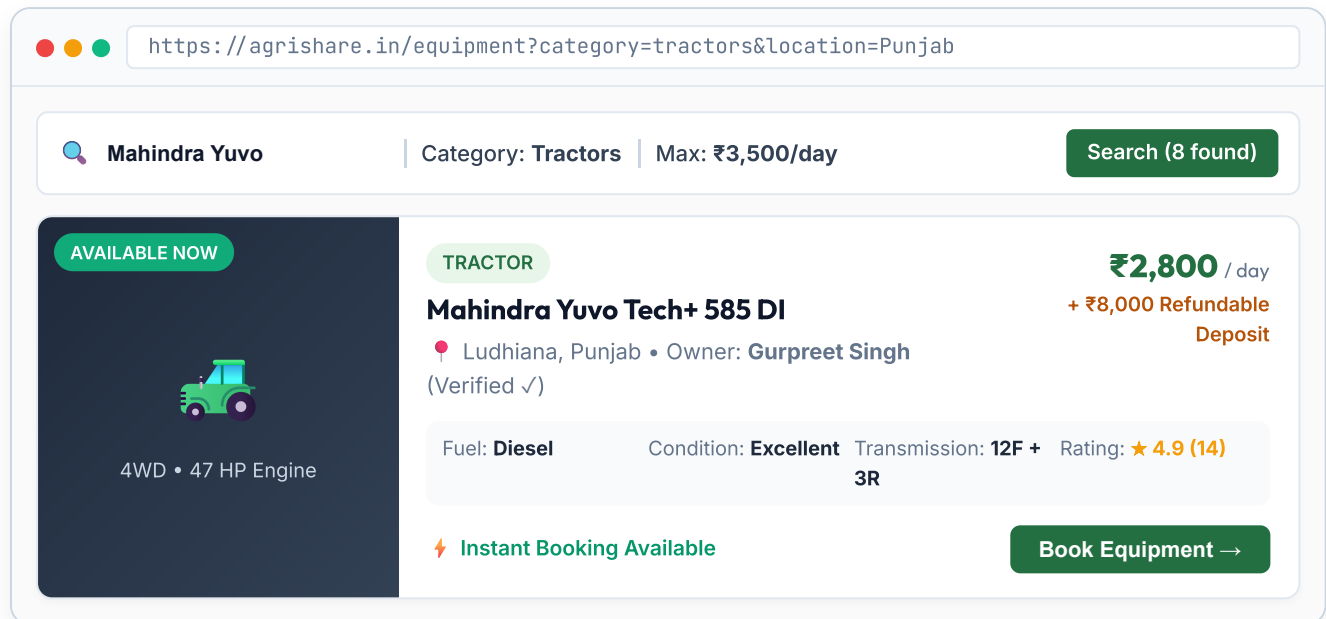

Role	Full Name / Profile	Email Address	Location	Default Access
Superadmin	AgriShare Admin	admin@agrishare.com	New Delhi, HQ	Full System Admin & Django Portal
Owner	Gurpreet Singh	gurpreet.singh@agrishare.com	Ludhiana, Punjab	Mahindra Yuvo 585 DI, Swaraj 855 FE
Owner	Rajesh Patel	rajesh.patel@agrishare.com	Rajkot, Gujarat	John Deere 5310, Lemken Opal Plough
Owner	Vikram Choudhary	vikram.choudhary@agrishare.com	Karnal, Haryana	Preet 987 Combine Harvester
Renter	Ramesh Sharma	ramesh.sharma@agrishare.com	Indore, MP	Active Bookings & Verified Reviews

⚡ One-Click Demo Login

The frontend login page features instant pre-fill buttons for both **Demo Farmer** and **Demo Owner** accounts, eliminating the need to type credentials during live demonstrations.

Step 1 & 2: Discovering & Inspecting Machinery

Farmers can effortlessly filter equipment by region, crop stage, machinery type, and maximum daily budget.

Multi-Parameter Filtering

Users can narrow down choices using dynamic query parameters: **Location** (District/State), **Category** (Tillage, Seeding, Harvesting), and **Condition** (New, Excellent, Good).

Guaranteed Verification

Every listed machine includes mandatory photo verification, serial numbers, and real reviews from past farmers who completed physical rentals.

Step 3: Booking Creation & Cost Calculator

Transparent mathematical calculation prevents billing disputes between farmers and machine owners.

Action Required

Renter Name	Machinery	Dates	Total Amount	Approval Action
Ramesh Sharma	Mahindra Yuvo 585	15 Oct - 18 Oct (3d)	₹16,400	Approve Reject
Baljit Kaur	Swaraj 855 FE	20 Oct - 22 Oct (2d)	₹12,500	Approve Reject

 **Listing New Machinery**

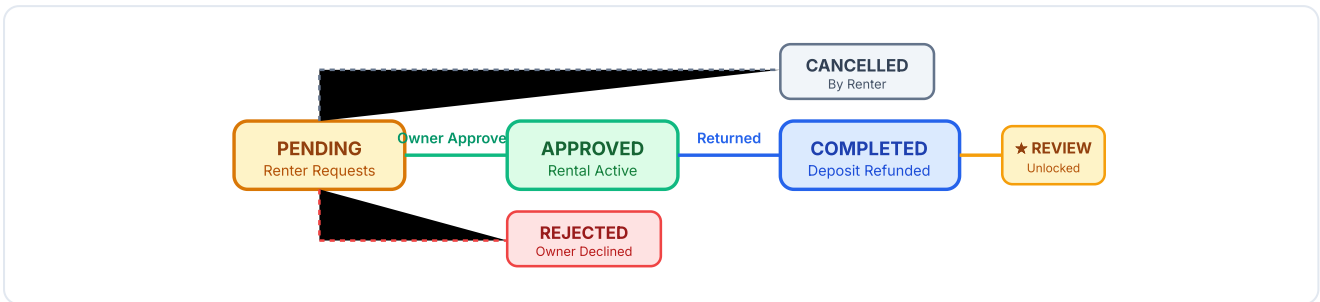

- Select appropriate category (Tractors, Seeding, Harvester)
- Upload up to 5 actual photos of the machine
- Specify year, horsepower, and operational condition
- Define daily rental price and required security deposit

 **Dispatch & Handover Checklist**

- Verify renter identity and booking QR/code
- Inspect hour meter & fuel tank status on pickup
- Conduct a 2-minute operational safety walkthrough
- Mark booking as **COMPLETED** once machine is returned

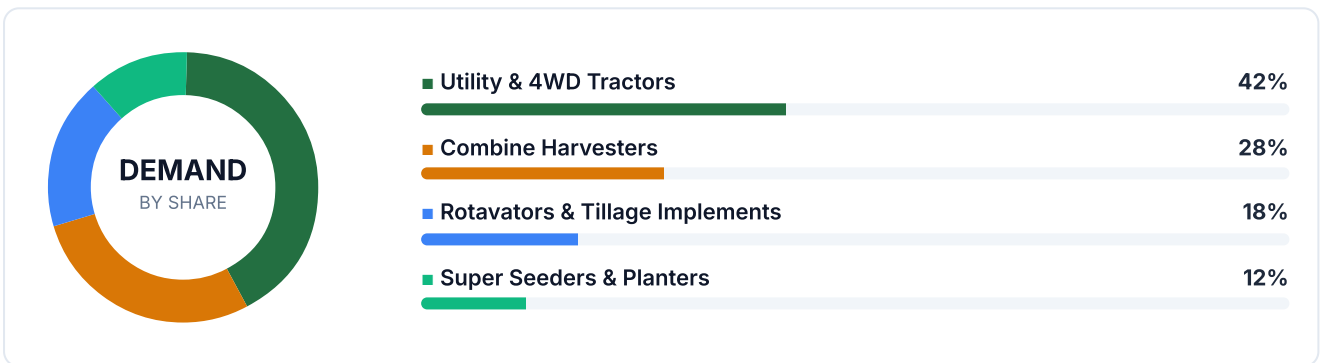

Booking Lifecycle State Machine

Formal state transitions enforced automatically by Django REST Framework business logic.

Market Adoption & Rental Demand Breakdown

Rental distribution across equipment categories based on seasonal farming cycles in North and West India.

Verified Reviews & In-App Notifications

Built-in safeguards protect community integrity and keep all stakeholders synchronized.

★ 100% Verified Review Rule

Unlike generic classifieds, **only renters who have successfully completed an approved booking** can publish ratings (1–5 stars) and comments. Fraudulent or paid reviews are physically blocked by database-level constraints.

🔔 In-App Notification Triggers

Instant notifications alert owners of new booking requests, and alert renters upon owner approval or rejection. Unread notification counts are prominently badged in the navigation bar.

Frequently Asked Questions (FAQ)

Q: How does the security deposit refund process work?

The security deposit is held safely during the active rental period. When the machinery is returned in original condition and the owner clicks **Complete Rental**, the deposit is promptly unlocked for the renter.

Q: What happens if two farmers try to book the same tractor on overlapping dates?

The AgriShare backend validates booking intervals at the database transaction level. Once an owner approves a booking, overlapping requests for that machinery are automatically rejected to prevent double-booking.

Q: Can an equipment owner rent their own equipment?

No. The backend enforces an anti-self-rental rule (`renter ≠ equipment.owner`), returning HTTP 400 Bad Request if an owner attempts to create a booking for machinery they registered.

Q: What if the equipment breaks down in the field?

Renters should immediately notify the owner via phone/in-app alert. Normal mechanical wear-and-tear is covered by the owner's maintenance responsibility, whereas operator error or physical impact damages are assessed against the security deposit.
